PROFILE

Results-driven technical support specialist with 7 years of experience across sales, fintech, MarTech, and IT administration. Experienced in handling enterprise-level clients, critical payment incidents, and cross-functional escalations across Asia Pacific & Japan and Southeast Asia. AWS-certified and actively building cloud infrastructure skills through independent projects, combining a strong support foundation with a clear drive toward cloud solutions.

EXPERIENCE

Solutions Support Specialist - APJ

Apr 2025 – Nov 2025

Impact.com (MarTech)

- Delivered enterprise-level product support to customers and partners across Asia Pacific & Japan via chat and ticketing systems, resolving high-complexity tickets daily.
- Managed support cases end-to-end in Salesforce, Jira, and Slack, from logging through resolution and follow-up.
- Led full-cycle integrations for API, FTP, payment systems, contracts, and fraud-check processes, ensuring data accuracy.
- Replicated and documented client-reported bugs, coordinating directly with the engineering team to monitor fixes and ensuring clients were kept informed throughout the resolution process.
- Proactively flagged recurring bug trends, unusual ticket spikes, and scheduled server-side maintenance to the broader team, ensuring all members stayed informed and could set accurate client expectations.
- Investigated webhook failures, API timeouts, and integration misconfigurations using cloud-hosted backend dashboards, diagnosing root causes and coordinating resolutions across technical and client-facing teams.

Technical Support Specialist

Jan 2024 – Nov 2024

Fiuu - Payment Gateway (formerly Razer Merchant Services)

- Resolved 80+ tickets daily from SME and enterprise clients across Southeast Asia on backend integrations, reducing client downtime by 30%.
- Maintained 95% SLA compliance as appointed VIP support partner, providing white-glove technical assistance to high-profile enterprise merchants including major tech, e-commerce, bank, and government accounts.
- Managed critical payment incidents affecting multiple merchants simultaneously, coordinating with engineering and internal teams to diagnose root causes and restore service with minimal disruption.
- Acted as informal escalation point for junior team members on complex integration and transaction issues, sharing technical knowledge to drive faster resolutions across the team.

IT Support Administrator / Secretariat

Jun 2021 – Dec 2023

Malaysia Association of Energy Service Companies (MAESCO)

- Led migration of physical document workflows to a cloud-based SaaS platform, improving operational efficiency and secure data accessibility across all committee levels.
- Liaised with government bodies, agencies, and international partners to drive consultancy and advisory collaborations.
- Managed organisational IT infrastructure including cloud account administration, email systems, network troubleshooting, and AV setup for virtual and physical board meetings, ensuring seamless day-to-day operations.
- Developed and distributed the MAESCO-ESCO Energy newsletter to a national network of active industry members, driving stakeholder engagement and knowledge dissemination across the energy services sector.

Sales & Mac Specialist Consultant

Mar 2018 – Apr 2021

Switch, Apple Store

- Consistently exceeded monthly sales targets, achieving the highest individual sales record of RM 191,396 through strategic customer engagement, needs-based selling, and expert product positioning.
- Served as a trusted Apple product advisor, delivering personalised one-on-one consultations on macOS ecosystems, hardware specifications, and software solutions to drive informed purchase decisions.
- Oversaw daily store operations including inventory management, sales reporting, and floor coordination, ensuring seamless retail performance and consistently high standards of customer service.

CLOUD & AI PROJECTS

Actively building hands-on cloud and AI projects, deploying on EC2, S3, and CloudFront, building serverless apps with Lambda, API Gateway, and DynamoDB, automating workflows via EventBridge and CI/CD pipelines, provisioning cloud infrastructure with Terraform (VPC, subnets, security groups), and developing a local AI research agent. Documented at [nidinshah.com](https://www.nidinshah.com).
